GUARANTEED CORE VALUE

We believe in providing our customers with options and alternatives. We always try to give you options when you request a quote:

- FluidDyne New Units
- Parts, Assemblies or Units?
- Reman with exchange?
- Reman without exchange?

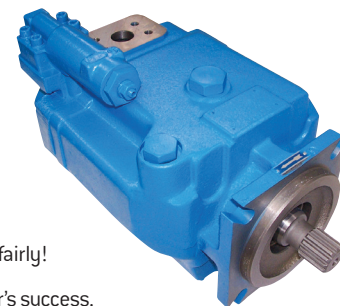

Piston Pumps

FluidDyne Fluid Power offers a complete line of rugged high pressure piston pumps for both the mobile and industrial markets. Units are available in displacements from 10 to 140cc/rev with mounts ranging from SAE "A" to SAE "D". The pump control has pressure, flow or power compensation allowing for efficient circuit planning and energy savings. Thru-shafted units allow compact design of dual pumps circuits to save space.

Supply us with a core - it reduces your cost.

You can send a core in advance or send it at your convenience. You can get a core credit against an individual sale or save up your cores, send them to us; we will inspect them and maintain a credit account toward future purchases. Established customers receive guaranteed core value listings so they know in advance how much to expect in exchange for their cores.

There are many ways to deal with us. We deal with you in only one way - fairly!

Superior quality, availability and pricing are the key to FluidDyne Fluid Power's success. We promise only what we can do and we do what we say.

We respect and protect our "customer's customer" by referring them back to the people who provide the valuable local service and support. Call or email and experience the difference our people can make...
