Manual Operated Directional Control Valves
D03 & D05

• Reliable and Dependable
• Cost Effective Replacement
• Maximum Operating Pressure at 4,500 psi
• 18 Month Warranty

www.FluiDyneFP.com
**D03 (NG6) Directional Control Valve**

Flow rate is 15 gpm and Max Operating Pressure is 4500 psi

**Series**
- WFDG - Directional control valve, manifold or subplate mounted

**Manual Operation**
- 17 - Lever

**Rated Pressure**
- V - 315 bar (4500 psi)

**Interface**
- 3 - ISO-4401-03
- NFPA-D03

**Spool Spring Arrangement**
- A - Spring offset
- C - Spring centered
- N - No spring detented

**Spool Types**
- 0, 2, 6 & 8

See Spool Chart Below

**Spool Type**

- **2 Position Spring Offset**
- R.H. “0A”
- L.H. “2A”

- **3 Position Spring Centered**
- “0C”
- “2C”
- “6C”
- “8C”

- **3 Position Detented**
- “0N”
- “2N”
- “6N”
- “8N”

FluiDyne supports the distributors providing local knowledge and assistance to fluid power customers.

Our people provide extensive support:

- Engineering Expertise
- Decoding special part numbers
- Identification of parts within units
- Advice on component repair and assembly
- Component failure analysis
- 18 month warranty
- New application component selection
- Same day shipment

Reinan Units & Parts Available for Racine, Oilgear, Bosch, Continental and More!

Powered by Customer Service!
